MASTER GAME DESIGN DOCUMENT

Final Draft v2.0 for Developers

Lion's Den University, Lagos • 18+ • Minimalist 3D • Learn. Hustle. Survive.

7 November 2026 • naijacampuslife.com • Confidential: for the development team

Contents

Contents 2
1. Review of Draft 1 and What Changed in v2.0 3
2. Vision, Pillars and Brand Facts 4
3. World Bible and Map Specification 6
4. Characters and Factions 8
5. The Villain: Chairman and the String System 10
6. Lady Cat: The Greatest Temptation 12
7. The Slide: Descent System ("Deeper and Deeper") 14
8. The Big Money Path: Getting Very Rich on Campus 16
9. Campus Conflict Systems 18
10. Campaign Outline and Mission Catalogue 21
11. First Playable Arc (M-01 to M-08) 24
12. Core Systems 28
13. Decision Variables and Save State 30
14. Endings and Progression Rules 32
15. Technical Architecture and Production Roadmap 34
16. Risks, Scope Controls, Assumptions and Founder Decisions 36
17. Appendix: Developer Content Rules and Glossary 38

For the development team
How to use this document: Sections 1 to 3 set the vision and world. Sections 4 to 9 define people and the new systems (villain, temptation, descent, wealth, conflict). Sections 10 and 11 hold the missions and the first playable arc. Sections 12 to 15 are the build specification. Section 16 lists risks and the decisions needed from the founder.

1. Review of Draft 1 and What Changed in v2.0

Draft 1 was a sound skeleton but had five gaps: a weak central villain, no single "great temptation", no explicit moral-descent mechanic, no deliberate wealth fork, and no campus-wide conflict systems. v2.0 closes all five and is written to be built from.

Review finding in Draft 1	Why it mattered	Fix in v2.0 (section)
Chairman was a mid-level recruiter and the real power was a hidden "senior figure" revealed only at the end.	The player had no recurring antagonist for three years. The late twist felt disconnected from play.	Chairman is now the visible, permanent villain: a student who refuses to graduate and pulls every string, and who is never caught by normal means. The "hidden senior figure" is removed. (Section 5)
Nneka carried every temptation and manipulation role.	One character cannot be both the early money trap and the long-term seduction into the cult.	Nneka stays the early money temptation. Lady Cat becomes the greatest temptation of the whole game (power, wealth, belonging, love). (Section 6)
Wrong decisions caused isolated penalties.	No sense of a slow, compounding fall. Consequences felt like fines, not a descent.	New Slide system: eight rungs, a Compromise score, off-ramps that get more expensive, and a point of no return. (Section 7)
Wealth was a side system with a general promise that rich dropouts are possible.	The "get very rich on campus" fantasy had no decision point and no risk curve.	New Money Fork with three routes (Clean, Grey, Pride), six wealth tiers, and costs that scale with wealth. (Section 8)
Conflict was limited to one rival group and one election.	The campus did not feel like a place where institutions, gangs and staff push against each other.	New conflict engine: Campus Tension meter, gang territory war, a full student-union riot chain, lecturer power rivalry, and admin-versus-student clashes. (Section 9)
Mission list had chapter-sized missions and a few optional ones.	Not implementable as data; new content had nowhere to sit.	27 main missions, 16 side missions, one data template, and a scheduled "Chairman Move" calendar. (Sections 10 and 11)
Tagline mismatch: documents say "Learn. Hustle. Survive."; logo says "Learn, Grow. Survive."	Brand inconsistency before launch.	Flagged as founder decision 1. This document keeps "Learn. Hustle. Survive." as instructed in the master prompt. (Section 16)

Design headline
The core change in one sentence: the player is no longer just surviving a campus; they are being worked on, by Lady Cat's offers and Chairman's strings, and every wrong choice makes the next one easier to say yes to.

2. Vision, Pillars and Brand Facts

Naija Campus Life: Into the Wolves is a minimalist 3D life-simulation where one decision in Year One can still be saving or ruining the player in Year Four, and where the biggest danger is rarely a fight: it is a very tempting offer.

The player is a newly registered adult student at Lion's Den University, Lagos. University is the starting point, not the goal. The player may graduate, become very rich, run the campus economy, lead the student union, join a cult, slide into crime, go to prison, drop out, be expelled, escape, or die. Nothing is forced.

Confirmed brand facts (from your materials)

Item	Confirmed
Title	Naija Campus Life: Into the Wolves
Setting	Lion's Den University, Lagos, Nigeria (fictional university and city)
Audience	18+
Visual direction	Minimalist stylised 3D, block-based / voxel-inspired, non-graphic
Brand colours	Gold and deep green (logo artwork). This document uses #1B4332 / #042F1B green and #C8993A / #C9A227 gold.
Logo	Gold crowned lion in a shield, laurel wreath, green-and-gold ring, "THE GAME" banner, gold controller, Lion's Den University building
Pillars used here	Learn. Hustle. Survive. (master prompt). Logo reads "Learn, Grow. Survive." - see founder decision 1.
Website	naijacampuslife.com (no features on the live site are assumed in this document)

Design pillars

Pillar	What it means in play	Design rule
Learn	Lectures, study, GPA, courses, lecturers, the academic record.	Academic standing is a real system with a permanent record, not a progress bar.
Hustle	Money, businesses, jobs, debt, trade, networking.	Wealth is a legitimate path. A rich dropout is a valid, fully supported life.
Survive	Bullies, theft, cult pressure, gangs, riots, police, scams.	Danger comes from choices and systems, never random violence. Death is foreshadowed and earned.
Temptation	Lady Cat, Nneka, quick money, shortcuts, belonging.	Every serious wrong turn is first offered as something attractive, with a believable reason to say yes.
Descent	Each wrong decision makes the next one easier and the way back more expensive.	The Slide (Section 7) governs all dark-path content. No wrong choice is a single penalty; it is a step.
Consequence	Immediate, delayed and hidden effects on every important choice.	Nothing resets. Debts, records, grudges, evidence and strings persist.
Freedom	No forced graduation.	Dropout, rustication, expulsion, prison and death are progression routes with their own content.

Tone and content guardrails

- Mature themes (cult recruitment, extortion, exam malpractice, abuse of power, arrest) are delivered through dialogue, suspense, aftermath and systems, not gore.
- Cultism and crime are never glamorous and never instructional. The game contains no real-world how-to detail for violence, crime, evading police or concealing evidence. Evidence, heat, strings and arrests are abstract game states.

- Every character involved in romantic or mature themes is explicitly 18 or older. Romance and intimacy are implied and off-screen, with clear mutual consent. Lecturer-student interest is always shown as abuse of authority (Section 9.4), never as a romance route.
- All gangs, cults, institutions and people are fictional. The groups in this document (The Pride, The Jackals) are invented names, not real campus confraternities.
- Nigerian voice is central: English and Pidgin code-switching, hostel culture, power cuts, generator noise. A Nigerian writer and sensitivity reader should review all dialogue before release.
- Not a photorealistic or GTA-style game. The logo art is glossy and realistic; in-game art is blocky and minimalist. Do not copy Minecraft assets, branding or distinctive protected designs.

Core loop

- Wake in the hostel: check phone, wallet, timetable, messages and rumours.
- Spend a limited day: class, study, work, social, or risk.
- Meet events driven by reputation, money, vulnerability and history. Offers appear when the player is weak (broke, failing, humiliated).
- Choices change the record: GPA, ledger, relationships, heat, compromise, strings, standing.
- Time advances. Old choices come back with interest, and Chairman notices.

3. World Bible and Map Specification

One connected city of 15 districts in three rings: Campus Core, Campus Edge and City. Everything is reachable from day one except gated interiors, which open through story, money, reputation, keys or relationships.

No.	District	Ring	Key locations	Access rule	Purpose
1	Main Gate and Security Post	Core	Gate, security hut, notice board, okada park	Open	Hub, police presence, lockdown point
2	Administration Block	Core	Registry, bursary, student affairs, disciplinary committee room, VC's office	Hours 8:00-16:00	Fees, records, hearings, protest target
3	Lecture Quarter	Core	Faculty halls, staff offices, exam centre	Enrolled; exam hall by timetable	Academic loop, lecturer storylines
4	Library and Study Commons	Core	Reading rooms, study pods, printing desk, archive	Open 8:00-22:00	Study, evidence research
5	Hostel Zone	Core	Male and female hostels, corridors, generator house, back rooms	Own room always; others by reputation or invitation	Home base, bullying, theft, recruitment
6	Cafeteria and Fellowship	Core	Cafeteria, fellowship centre, prayer rooms, noticeboard	Open	Social hub, safe community alternative
7	Student Union House	Core	Union office, hall, election stage, steps	Open; office after election	SUG politics, rallies, riot site
8	Campus Market	Edge	Stalls, print shops, phone accessories, food, supplier lane	Open; stall rental unlocks Ch. M-05	Economy hub
9	Sports Complex	Edge	Pitch, courts, gym, changing rooms	Open; teams by trial	Reputation, fitness, gang flashpoint
10	Nightlife Strip	Edge	Bar, club, VIP lounge ("The Cat's Lounge"), event hall	After 19:00; entry by money or invitation	Parties, Lady Cat, networking, risk
11	Off-Campus Residential	City	Private hostels, flats, family homes, landlords	Rent unlocks	Housing, escape from hostel politics
12	Transport Hub	City	Bus park, keke stand, bike rental, motor park	Open; fares apply	Travel, delivery jobs
13	Business District	City	Shops, suppliers, bank branch, warehouse, event venues	Unlocks with first shop	Scaling a business, wealth path
14	Police Station and Court	City	Station, cells, courtroom, legal aid office	Story-triggered or voluntary	Legal consequence loop
15	The Den (Restricted Zone)	Hidden	Old block, back rooms, meeting hall, The Pride's ledger room	Opens through faction trust or investigation	Cult storyline, final confrontation

Time, travel and schedule

- Day/night: 1 real minute = 20 in-game minutes, so a game day is about 72 real minutes. Four phases: morning, afternoon, evening, night.
- Week: lectures weekdays, market peak Friday-Saturday, fellowship Sunday, nightlife Thursday-Saturday, union meetings Wednesday.
- Semester: about 14 teaching weeks, 2 exam weeks, a break. Deadlines and exam weeks create urgency.
- Transport: walking (free, slow), keke and bus (cheap, scheduled), bike rental (mid), later own motorcycle or car (expensive, a business asset and a theft target).
- Power cuts: night outages in some zones affect lighting, fridges and laptop charging, creating daily choices and business risk.

Access gates

Gate	Opens by	Example
Time	Opening hours	Admin closes at 16:00
Money	Entry fee, rent, deposit	Nightlife cover charge; VIP lounge table
Reputation	Respect or notoriety tier	Hostel corridor control; union back office
Relationship	Trust level with a character	Lady Cat's lounge, Amara's study group
Key item	Keycard, contact, evidence	The Den door, the ledger room
Legal state	Not detained, not suspended	Rusticated players barred from lecture halls
Campus state	Tension and lockdown	Gate closes during a riot; market shuts

Population and life

- 60 to 80 named or semi-named characters carry schedules and memory. Everyone else is ambient crowd from a few reusable block-character models.
- Each district has background routines: students moving to class, vendors setting up, security rounds, union noticeboard campaigns.
- Dynamic events arrive on the phone: rumours, flash sales, notices, elections, security alerts, party invites.
- Prototype scope: Hostel Zone, Cafeteria, one lecture hall and a slice of the Campus Market only. Districts 7, 10, 13, 14 and 15 are release-1 or later.

4. Characters and Factions

Every major character has a want, a secret and a memory of the player. All characters are 18 or older. Ages are proposed and may change but must stay adult. Looks are written for block-style 3D: a silhouette, a colour, a signature item.

The protagonist

- Default name: player-chosen, suggested default Tobi Adeyemi (founder decision 3). Age 18, fresh from secondary school, first time living away from family.
- Starts with N8,500, a plain outfit and neutral trust with everyone. Customisable block avatar; clothing and accessories carry reputation tags.
- Core tension: family sacrifice and expectation versus the shortcut culture of campus, with a believable reason to take every shortcut.

Principal characters

Character	Age	Look (block style)	Wants	Secret	Fear	Fate range
Chairman (Obinna Adeleke)	31	Tall, cream jacket over student wear, gold lion ring, always smiling, never raises his voice	Keep the campus as his kingdom; never graduate	Enrolled for 9 years through manipulated records; every power he has is borrowed leverage	Losing the ledger of his strings	Falls, escapes, is replaced, or is inherited by the player
Lady Cat (Catherine Eze)	21	Slim silhouette, cat-eye shades, emerald ring, green-gold scarf; moves like she owns the room	Money, independence, a way out she can control	Keeps the only written ledger of Chairman's strings; was recruited as a fresher through her family's debt	Being discarded or exposed	Ally, betrayer, partner, heir, escapee or sacrifice
Nneka	20	Tall, gold earrings, bright wrapper-print top	Money, safety	Owes The Pride; reports to Lady Cat	Abandonment	Genuine partner, exploiter, blackmailer, ally or sacrifice
Amara	19	Short, round glasses, bag of notes	First-class degree, a clinic one day	Her scholarship depends on a recommendation from Dr. Okoro	Losing her scholarship	Loyal friend, romantic path, key witness
Dr. Okoro	48	Grey beard, heavy coat, red marking pen	Control, authority, income	Sells marks through a middleman; Chairman holds proof	Audit and exposure	Exposed, protected, reformed or retired
Mr. Salami (assistant lecturer)	29	Neat shirt, lanyard, easy charm	Admiration and influence	Uses his position to pressure adult students	Losing his post	Exposed, protected by Okoro, or reformed
Killer	23	Largest build, scarred eyebrow, corridor jacket	Respect, rent from newcomers	Funds a sick sibling; reports to Chairman	Looking weak	Enemy, reluctant ally, informant or victim
Razor (Jackals leader)	25	Lean, torn blue sleeves, quick feet	Take territory from The Pride	Secretly negotiating with Chairman	Betrayal from inside	Peace partner, rival, or Chairman's puppet
Inspector Danjuma	41	Formal cap, notebook, tired eyes	A clean case and a fair outcome	Once let a campus case go and regrets it	Another student dying	Ally, obstacle or relentless pursuer, depending on player honesty
Comrade Femi (SUG President)	24	Bright shirt, megaphone, union badge	Fee reversal, a legacy	Funds his campaign through a Chairman string	Losing the students' trust	Hero, sell-out, or arrested

Supporting cast

Role	Examples	Function
Roommates	The Quiet One, The Hustler	Daily companions; one may become a business partner or informant
Student leaders	Rival candidate, hostel chairperson	Elections, riot organisation, access to influence
Business owners	Mama Cafeteria, Alhaji (supplier), print-shop owner	Jobs, credit, supply deals, fraud risk
Staff	Fair lecturer, mentor lecturer, registry clerk, warden, security chief	Help, information, bribe temptations, strings
Family	Mother, father, older sibling, uncle	Support, pressure, emergency money, fallout from arrest
Legal, welfare, press	Legal aid officer, counsellor, chaplain or imam, campus blog editor	Non-violent ways out; off-ramps on the Slide; exposure route

Character data card (every named character)

Field	Meaning
Schedule	Location by hour and weekday; changes with events and lockdowns
Trust and fear	Trust -100 to +100; fear 0 to 100; gates dialogue and missions
Memory flags	Money lent or refused, promises kept or broken, secrets shared, confrontations
Strings	Which of Chairman's strings (if any) hold this person, and their cut status
Mission role	Giver, antagonist, witness, informant, love interest, victim
Possible fate	Resolved by campaign state in Missions M-24 to M-27

> **Design rule**
> Joining the Academic Circle, the Fellowship or the Traders' Association gives real, non-violent protection. This is the intended alternative to The Pride and must always be a viable option.

Factions

Faction	Motive	Territory	Rivals	Reputation effect
The Pride (Chairman's cult-linked network)	Control students through protection, money and obligation	Hostel back rooms, The Den, Cat's Lounge, parts of the market	The Jackals, SUG, Academic Circle	Raises protection, access and wealth; raises heat, obligation and descent
The Jackals	Break The Pride's hold; take territory and rent	Sports edge, off-campus streets, motor park	The Pride	An alternate dangerous path; not safer, just different
Student Union Government (SUG)	Representation, fee fights, power	Union House	Admin, both gangs	Legitimate political power; riot risk
Academic Circle	Protect standing and results	Library, study pods	Exam racket	Study help, references, a safer social base
Market Traders' Association	Stable commerce	Campus Market	Extortionists, scammers	Supplier credit, customer base, group protection
Fellowship and Associations	Community and meaning	Fellowship centre	None	Moral support; a real non-violent shelter
University Administration	Order, fees, image	Admin block, security	SUG	Discipline, scholarships, hearings
Security and Police	Order; with corruption temptation	Gate, station	Gangs	Legal outcomes; bribe offers are traps

5. The Villain: Chairman and the String System

Chairman is a perpetual student, in his ninth year, who has refused to graduate because the campus is his kingdom. He is never caught by normal means because he never touches anything himself: he holds strings on other people, and when heat rises he moves the blame down a string.

Who he is

- Official status: "final-year student with carry-over courses". The status is kept alive by a string on a registry clerk. If that string is cut, his enrolment becomes challengeable, which is a key late-game lever.
- Public face: smiling, generous, sponsors parties and scholarships "for the boys". Private reality: everything he gives comes with a string.
- Voice: calm, courteous, quietly threatening. He says "I am not asking for much" and "Think about it. The offer does not stay open forever."
- He is not one-dimensional. He believes he protects students from a hostile system; the game shows both his protection and the price.

What a string is

A string is a leverage card Chairman holds on one person. It is the game's model for how an untouchable villain stays untouchable, and it is the player's route to bringing him down. No string is a real-world method; each is a narrative state.

String type	Example holder	What Chairman holds	How it can be cut
Debt	Killer	Medical bills for Killer's sibling	Pay or relocate the debt; fund treatment; or give Killer a better lender
Secret	Dr. Okoro	Proof of grade selling	Take the proof first (dangerous) or expose Okoro to the committee
Favour	Registry clerk	Clerk was saved from dismissal; owes records manipulation	Offer protection through a whistleblower route; or evidence from Library archive
Fear	A union officer	Threat to family and records	Witness protection through Danjuma; SUG backing
Love	Nneka, Lady Cat	Protection of a sibling or family debt	Resolve the family problem; this is the most personal cut
Position	Police sergeant (minor)	Shared payments; ledger entries	Internal complaint with strong evidence; Danjuma's ally path
Money	Supplier Alhaji	Credit line and supply deals	Replace the supplier with a clean contract
Rank	Security chief	Promotion and cover for night entry	Replace via administration complaint

Eight core strings exist (one per type above). Cutting a string is a mission with its own choices, never a menu click. Each cut reduces Chairman's Teflon and gains the player a witness, evidence item or ally.

How he keeps himself untouchable

Mechanism	Rule
Teflon meter (0 to 100)	Starts at 100. Each cut string, ledger page, witness or institutional ally lowers it. Chairman can only be arrested or expelled when Teflon is 20 or below.
Heat Shift	When heat on Chairman reaches 60, a "Fall Guy" event fires. A string-holder takes the blame (the player if the player is complicit and exposed; otherwise Killer, a lecturer, Nneka or an innocent). Heat drops by 40.
Distance	Chairman never appears in evidence directly. Messages come through intermediaries; the game never lets the player prove a link without the ledger or a witness.

Mechanism	Rule
Escape set-pieces	He escapes three scripted takedown attempts (Years 2, 3, 4). Each escape costs the player something and reveals one more string.
Replacement	If Chairman is removed without cutting strings, the strings pass to a successor (Lady Cat, Razor or the player). The Pride survives.

How he puts everyone, including the protagonist, in trouble

From the moment the player becomes visible to him (Notice 20), Chairman fires a scheduled "Move" each semester. Moves are chosen by what the player is vulnerable to, so the pressure always feels personal and earned.

Move	Trigger vulnerability	What happens	Counterplay
Squeeze	Debt, money owed to any Pride-linked lender	Debt is called early; interest changes; business stock is seized in game terms	Refinance, sell assets, ask Amara or family, or clear the debt with a clean contract
Frame	Held evidence, messages, being near an incident	A message trail or witness statement points at the player	Preserve receipts, alibis, a lawyer, Danjuma's trust
Isolate	Close friends and allies	A friend is turned or scared away	Honest repairs; a Fellowship or Circle safe net
Drain	Wealth and businesses	Supplier fraud, staff turned, shop closure order	Traders' Association, spare suppliers, security upgrade
Expose	A held secret (cheating, ledger entries, relationship)	Rumour or leak hits the campus blog	Counter-evidence, early confession, press ally
Summon	High notoriety or high wealth	An offer with worse terms than the first; refusing has a visible cost	Refuse and absorb; or cut a string first to weaken him

Chairman Move calendar

When	Move	Typical mission
Y1 S2	Squeeze (via Nneka and Killer)	M-06, M-08
Y2 S1	Frame (first arrest)	M-09
Y2 S2	Isolate or Drain, by player build	M-11, M-12
Y3 S1	Expose (blackmail, exam leak)	M-14, M-18
Y3 S2	Fall Guy (second arrest)	M-20
Y4	Summon, then final offer; takedown escape 3	M-23 to M-26

How to beat him (the takedown campaign, M-24 to M-26)

- Cut at least 5 of the 8 strings, which lowers Teflon to 20 or below.
- Recover The Ledger from Lady Cat (Section 6) or reconstruct it from archive, witness and registry evidence.
- Have an institutional partner willing to act: Danjuma, a university panel, the campus press, or SUG.
- Survive the final Summon with enough allies and evidence intact.
- If the player fails, Chairman survives and the world state shows The Pride in power. This feeds three endings (Section 14).

Chairman as an inheritable seat

On the dark path, a high-rank Pride member can take over his strings and become the next Chairman (Campus King ending). The player then faces Move-like pressure from the other side of the web, and every string they hold is a person they must keep afraid or loyal. The game shows this as rule, cost and loss, not as a fantasy of power.

6. Lady Cat: The Greatest Temptation

Lady Cat is the most tempting person in the game because she offers everything the player is missing at the exact moment they miss it: money, status, protection, belonging, and being wanted. She is also a trapped, intelligent adult with her own agenda, not a trap on legs.

Character design

- Age 21, third-year student, the face of The Pride's social side. She curates the guest list for Cat's Lounge (District 10) and decides who gets in front of Chairman.
- Personality: warm when it matters, precise, patient, quick to read people. She never begs and never rushes; she lets the player come to her.
- Backstory: recruited as a fresher after her family's debt was taken on by Chairman. She rose by being useful and now handles introductions, parties and the discreet side of The Pride's money. She keeps a private ledger of every string, because it is her only insurance.
- Goal: leave with enough money and leverage to be free. She is not sure the player can help her do that or only be another person she manages.
- Dialogue style: calm English with confident Pidgin when she relaxes; never needy.

Why she is the greatest temptation

Temptation	What she offers	Why it works	The hook
Access	Entry to Cat's Lounge, introductions to rich and powerful students	Fixes loneliness and status at once	Every guest is on a string; the player becomes one
Money	A "small errand" or role with big pay	Solves debt or a failing business	First step on the Slide (Rung 3 or 4)
Protection	Her word keeps Killer and the Jackals away	Real safety when the player is scared	Protection is a loan, called when she says
Romance and belonging	Closeness, being chosen, a shared plan	The player has a believable emotional reason to say yes	She may be sincere and still use it; the game keeps this ambiguous
Revenge	A way to punish Killer, Okoro or a rival	Humiliation turned into power	Revenge needs a favour; favours become strings
Shortcut to wealth	Co-ownership in a nightlife or events business	The fastest route to Tycoon tier	The business is funded and watched by Chairman

How the temptation is triggered

Offers fire from **vulnerability triggers**, not from a calendar. The system watches for low cash, an academic failure, humiliation, loneliness, debt pressure or a recent loss. Lady Cat is never random; she arrives when it hurts most, and the offer fits the wound.

Trigger	Condition	Typical offer
Broke	Cash below N3,000 and no income this week	Money errand or loan
Failing	GPA below 2.0 or failed exam	A "fix" for marks (a trap through a string on Okoro)
Humiliated	Public embarrassment, lost fight, rumour	Revenge or protection
Lonely	No friends with trust 20+	Belonging, parties, closeness
Rising	Net worth above N250,000	Partnership in a bigger venture
Cornered	Heat above 40 or active threat	Protection or a hiding place

Her relationship arc

Stage	Year	What happens	Player decisions
1. Introduction	Y1 S2	Party at Cat's Lounge. She notices the player and tests them with a harmless favour (M-07).	Accept, decline, flirt, ask questions
2. Courtship	Y2	Small, kind gestures that solve problems. The first real offer arrives.	Which offer to take; what to ask in return
3. Entanglement	Y2-Y3	She asks for something that costs the player. She also shows a real, vulnerable side.	Protect her, use her, test her, tell Amara
4. Fork	Y3	Chairman pressures her to deliver the player, and she is forced to choose.	Back her, break with her, take the offer, or confront Chairman together
5. The Ledger	Y4	The ledger can free many people or end her. She decides how to use it.	Earn her trust, steal it, destroy it, or help her run

Possible fates

Fate	Conditions (summary)
Ally who delivers the ledger	Lady Cat bond 60+, no betrayal flags, player cut 3+ strings
Betrays the player on Chairman's order	Bond below 30 or she is cornered with her family at risk
Partner who rules The Pride with the player	Pride rank high, ledger withheld, Chairman removed or replaced (Campus King)
Next Chairman	Player never forms a bond; she takes the strings after Chairman falls
Escapes abroad or elsewhere	Player funds her exit; the ledger is delivered to Danjuma first
Does not survive the final night (non-graphic)	Ledger exposed publicly without protection; Chairman hits first

Design rule
Lady Cat must always be playable as a person. The player can refuse every offer and still find her interesting, and she can be redeemed. Her role must never reduce to "sexy trap". All intimacy is off-screen and between consenting adults.

7. The Slide: Descent System ("Deeper and Deeper")

Every wrong decision is a step down a ladder, not a one-off penalty. Each step looks small and has a believable reason, each step makes the next one easier to say yes to, and each step makes the way back more expensive. The design inspiration is the slow moral descent of long-form crime drama.

The rungs

Rung	Name	Typical entry	What it unlocks	Cost of leaving (off-ramp)
0	Clean	Default state	Full legitimate content	None
1	Shortcut	Copy an assignment, skip a fee, small lie, buy a "pass" tip	Small time or money gain	Own up; small penalty
2	Favour	Accept help from someone with ties to The Pride or Okoro	Contacts, small perks; first string on the player	Repay the favour honestly; cost in time or cash
3	Debt	Borrow from a Pride-linked lender; sign for goods you cannot pay for	Cash, supply, quick expansion	Pay in full (big), or refinance with a clean source
4	Complicity	Carry messages, hold items, cover for others knowing something is wrong	Steady pay, status, protection	Give evidence against yourself or others; lose protection
5	Crime	Take part in a game-world illegal act (theft ring, extortion, exam racket)	Large income, rank in The Pride	Confess, cooperate with Danjuma, lose assets; strong legal consequence
6	Inside	Charged, wanted, high rank, or deep in The Pride	Leadership content, safe houses, bigger money	Very high: witness protection route, family fallout, loss of studies
7	Point of no return	A death or life-altering harm that flows from earlier choices	Dark-ending content only (Campus King, Prisoner, Disappeared, Death)	Redemption possible only in the Whistleblower ending, at great cost

Compromise and Heat

Variable	Meaning	Range	Visible?
Compromise	How far the player has slid. Each wrong choice adds points; leaving the path subtracts them slowly.	0-100	Partly (mood and UI shift)
Rung	Derived from Compromise thresholds: 0, 10, 25, 40, 55, 70, 85, 95	0-7	Hidden numbers, visible tone
Heat (personal)	Police and campus attention on the player	0-100	Partly
Notice	How closely Chairman is watching the player	0-100	No (felt through Moves)
Justification	Short inner-voice lines that rationalise each step	Text	Yes, as a thought bubble

Rules

- **Offers, not force.** Each new rung arrives as an Invitation scene. The player may decline once per rung. Declining is a real choice with a cost (a resource shock), but it does not end the game.
- **Wrong choices add Compromise.** Weights: Shortcut 3, Favour 5, Debt 8, Complicity 10, Crime 15, Violence 20. Honest recovery actions subtract 2 to 5 per semester.
- **Every fix needs a bigger wrong.** The game deliberately offers a larger shortcut to solve the problem the last one created. This is how the "breaking bad" feeling is built.

- **Off-ramps get more expensive.** Leaving costs multiply by rung number. At Rung 4 and above, each exit demands a sacrifice (an ally, an asset, evidence against yourself).
- **Mirror moments.** At Rungs 2, 4 and 6 a trusted character (family, Amara, a chaplain) reacts to the change. The reaction scene is non-skippable and shown in-world.
- **Tone shift.** UI colour desaturates, music drops, hostel NPCs change how they greet the player. The world visibly changes with the slide.
- **Rewards are real.** Dark routes pay more at first and feel good. Without real rewards the descent would be a lecture, not a game.
- **No instruction.** Wrong acts are always shown as game states and consequences. The game never teaches a real-world method.

Worked example: a typical slide (Year 1 to Year 3)

Step	Event	Rung	Off-ramp offered	Justification line
1	Misses a deadline; copies Amara's notes without asking (M-10)	1	Apologise to Amara	"Everyone does it. Just this once."
2	Fails a test; Lady Cat offers an introduction to Okoro's "fixer"	2	Study group (S-01), Amara	"It is only an introduction."
3	Fixer takes N20,000; Okoro's string appears; player cannot pay rent	3	Family loan, Fellowship fund, part-time job	"I will pay it back by next month."
4	To clear the debt, player carries a bag between two hostels (M-12 side)	4	Tell Danjuma or the warden	"I do not know what is inside."
5	Bag is part of a theft ring; a student is hurt in the aftermath	5	Give evidence (lose protection, face charge)	"I did not hurt anyone."
6	Police attention; Chairman moves a Fall Guy toward the player (M-20)	6	Lawyer, witness-protection route	"They will not believe me anyway."
7	A friend dies in the fallout; player either confesses and rebuilds or goes deeper	7	Redemption only	"It is too late to go back."

The way up (counter-slide)

- Honest recovery lowers Compromise slowly. A clean semester, a repaid debt, a confession or a cut string each reduce it.
- Allies help: Amara, the Fellowship, the Traders' Association, a counsellor, Danjuma. Each is an optional way out at a different rung.
- The Whistleblower ending and "Redeemed" paths are the intended payoff for climbing back.

8. The Big Money Path: Getting Very Rich on Campus

The player can become very rich without a degree. This is a genuine route, built around one decision (the Money Fork) and a risk curve where wealth brings more attention, more cost and more strings.

Wealth tiers (game rules, tunable)

Tier	Name	Net worth	Typical daily profit	What opens	New pressure
0	Broke	Under N5,000	Under N500	Survival jobs	Debt offers
1	Hustler	N5k to N50k	N1,000 to N3,000	First stall or service	Theft risk
2	Plug	N50k to N250k	N4,000 to N10,000	Staff, second stall, supplier credit	Rival traders, Lady Cat offer
3	Boss	N250k to N1m	N15,000 to N40,000	Shop lease, delivery fleet, events	Extortion, Chairman Notice
4	Mogul	N1m to N5m	N50,000 to N120,000	Business District, investors	Strings, press, Move: Drain
5	Tycoon	N5m and above	N150,000 and above	Multi-venue empire, politics, politicians	Everyone wants a share

All figures are starting values for tuning and are fictional game economics, not real-world financial advice.

The Money Fork (Mission M-11, Year 2)

A supplier offers the player a chance to scale. The player can take any one route, and later mix or switch with consequences.

Route	How it works	Speed	Risk	Tone and unlocks
A. Clean Empire	Legitimate scaling: reliable suppliers, staff, receipts, Traders' Association, bank loans, investors	Slow to medium	Low: theft, competition, power cuts, fraud	Mogul and Tycoon possible; Chairman Notice grows slowly; a "Cleanest Campus Millionaire" ending path
B. Grey Money	Fast but shaky: unverified suppliers, cash-only, skipping fees and licences, selling to both gangs	Fast	Medium to high: fines, closures, scams, extortion, Rung 2-4 slide	Boss quickly; heat and Compromise rise; can still climb back
C. Pride Money	Chairman or Lady Cat finances and protects the player; profits are shared with The Pride	Fastest	Very high: strings, Moves, loyalty tests, Rung 4-6	Mogul and Tycoon fastest; owned by The Pride; Campus King route

Business tiers and costs

Business	Start	Daily profit (Boss)	Upkeep	Main risks
Food stall	N5,000	N1,500 to N3,500	Stock, gas, power	Spoilage, power cuts, competition
Phone accessories	N10,000	N2,000 to N5,000	Stock	Counterfeits, theft
Printing and photocopy	N20,000	N3,000 to N8,000	Paper, machine repair	Breakdown, queues
Laundry or delivery	N8,000 to N15,000	N2,500 to N6,000	Fuel, staff	Lost items, accidents
Events and entertainment	N25,000	N8,000 to N60,000 (per event)	Venue, security, permits	Crowd trouble, gang demands
Shop lease	N80,000	N10,000 to N30,000	Rent, staff	Supplier fraud, closure order

Business	Start	Daily profit (Boss)	Upkeep	Main risks
Wholesale and distribution	N250,000	N30,000 to N90,000	Warehouse, drivers	Large fraud, extortion
Nightlife venue (Cat's Lounge stake)	N400,000	N40,000 to N150,000	Licence, security, DJ	The Pride's ownership, police attention

Why wealth is not a free pass

- Visibility scales with wealth. Net worth above N250,000 raises Chairman Notice and Lady Cat's interest.
- Costs scale too: rent, staff, security, bribes demanded of you, fines and theft all grow with wealth.
- Wealth does not fix GPA. Buying marks is an academic offence (Section 12) that can end in rustication.
- Wealth does not clear police or reputation. A rich player with a record is still charged, and a legitimate Tycoon is still a target for extortion.
- Legitimate defences exist: Traders' Association membership, licensed security, a lawyer on retainer, clean books. These cost money and reduce risk.

Rich without a degree: how it pays out

- The "Dropout Tycoon" path (Section 14) unlocks after withdrawal with at least Boss tier and clean legal status. The player keeps the city open and continues building.
- A Tycoon can fund the SUG campaign, a scholarship fund or a rival Pride, changing the world state.
- A Tycoon who also graduates is a rarer, harder ending: "The Wealthiest Graduate".

9. Campus Conflict Systems

The campus pushes back from four directions at once: gangs, the student union, the administration, and staff who abuse power. A single Campus Tension meter ties them together so the world feels like it is heading somewhere.

9.1 Campus Tension meter

Band	Tension	What the campus feels like	Typical events
Calm	0 to 24	Normal days	Parties, lectures, markets
Uneasy	25 to 49	Rumours, extra security at the gate	Gang graffiti, union meetings, price rises
Tense	50 to 74	Groups avoid each other; curfew rumours	Threats, skirmish, protest planning
Volatile	75 to 89	Fights and walkouts likely	Riot, hostel raid, market shutdown
Lockdown	90 to 100	Gates close, classes suspended, businesses shut	Admin crackdown, mass questioning, arrests

Tension rises through gang incidents, fee hikes, unresolved scandals and rumours. It falls through mediation, admin concessions, arrests that look fair, and time. Players can push or pull tension through their choices, so even a peaceful player affects the world.

9.2 Student gangs: The Pride versus The Jackals

Zone	Default owner	Prize	Contest effect
Hostel back rooms	The Pride	Recruitment, rent, hiding places	Hostel is unsafe at night when contested
Campus Market lane	Contested	Protection fees, supply routes	Stalls close; prices rise; player business affected
Sports edge	The Jackals	Recruits, muscle	Match day riots possible
Nightlife Strip	The Pride (Cat's Lounge)	Parties, money, networking	Door security and permits change
Off-campus streets	The Jackals	Rent, motor park	Safe routes change
Union steps	Neutral	Protest ground	Contest triggers riot readiness

Escalation ladder

Level	What it is	Player options
1. Rumour	Whispers and graffiti	Ignore, spread, dispel, warn friends
2. Threat	Messages, "advice" to pick a side	Refuse, report, negotiate, comply
3. Skirmish	A small fight (non-graphic, cutaway)	Stay away, help the injured, call security, join
4. Clash	Group fight near a landmark	Mediate, warn potential victims, flee, take part
5. Lockdown	Gates closed, questioning, curfew	Cooperate, hide, lawyer, use your strings

Every level has at least one non-violent resolution (mediate, warn, report, rebuild, bring in the Fellowship or the SUG). Violent options exist but add Compromise and Heat, and are shown by sound, camera cuts and aftermath rather than gore.

9.3 Student union government (SUG), elections and riots

The SUG storyline is a four-stage chain that can end peacefully or in a riot. Chairman is behind a faction in the union (Comrade Femi's campaign funding), and his strings can be used to push the protest toward violence.

Stage	Trigger	What happens	Key choices
1. Fee Hike (M-15)	Admin announces fee increase or hostel changes	Union calls a meeting; students split on what to do	Organise, join, speak, stay out, spread information or misinformation
2. The Campaign (M-16)	Election season	Candidate Femi vs rivals; money and rumours flow	Back honest candidate, run, fund, use social media, manipulate, intimidate, stay neutral
3. Smoke on the Steps (M-17)	Peaceful protest turns tense; a provocateur appears	Crowd energy rises; Pride-linked agents push for confrontation	Steward the protest, negotiate with admin, expose the provocateur, protect friends, flee, escalate
4. Aftermath	Riot or successful peaceful action	Inquiry, suspensions, fees reversed or not, property damage	Testify, protect others, shift blame, rebuild, run for union office

Riot rules

- The riot is non-graphic: stylised crowd silhouettes, smoke, sound, and camera cuts. Injuries and damage are shown in aftermath scenes.
- Outcomes depend on how many players and NPCs chose peaceful options. The player can steward a mini-game to keep the protest calm.
- Consequences: market shutdown (business loss), curfew, suspensions, arrests, fee reversal, new union power, Chairman Move (Expose or Fall Guy).
- The player can be a Hero (peace), Journalist (campus blog), Organiser, Profiteer (sells to both sides) or Bystander. Each has gains and costs.

9.4 Rivalry with lecturers (abuse-of-power storyline)

Lecturers are not only grade-givers; some use their power over adult female students. The game shows this as abuse of authority that the player can resist, expose, ignore or join, never as a romance route for the player.

- Characters: Dr. Okoro (48) and Mr. Salami (29) pressure adult students whose grades or scholarships depend on them. Amara, Lady Cat and Nneka are possible targets depending on the story.
- The affected student has agency. She may want help, may refuse help, may want to handle it herself, or may be under another string. The player cannot "solve it" over her head.
- Mission M-13 "The Other Man" is the main chain; side missions deepen it. The player cannot date a lecturer, and a lecturer cannot be a romantic rival in the sense of a love story; the conflict is control versus consent.

Choice	Immediate	Delayed	Hidden
Support her and gather evidence (with her consent)	Evidence item; trust with her up	Strong witness for committee or press	integrity +; Okoro hostility +3
Report to the department	Complaint filed; slow process	Retaliation on marks; Chairman string on Okoro complicates it	complaint_filed; GPA risk
Confront the lecturer directly	Stand-off scene	Marks drop; possible disciplinary action	notoriety +; okoro_grudge +2
Compete or play dirty (leak a rumour, blackmail)	Short-term pressure on lecturer	Backfire, misconduct finding, Compromise rise	Rung 4 step; integrity -
Walk away	No immediate cost	She faces consequences without help; guilt scene	relationship trust -
Use it for personal gain	Money or marks	Blackmail rung; Chairman string on the player	Rung 4-5

9.5 Administration versus students

- Fee hikes, hostel evictions, curfews and security raids create pressure that feeds Tension and the SUG chain.

- Admin can offer concessions, scholarship cuts, or disciplinary action against organisers; each choice has Moves for Chairman to exploit.
- The player can work inside the system (committee seats, petitions, internships) or against it (protests, leaks, sabotage). Neither is automatically right.

10. Campaign Outline and Mission Catalogue

Four academic years in five acts. Each act ends with a fork decided by accumulated state. The 20 chapters of the original storyline are all preserved, reordered, and extended to 27 main missions and 16 side missions.

Five acts

Act	Years	Theme	Missions	Fork at end
1. Arrival	Y1 S1	Orientation, first loss, first income	M-01 to M-05	Study-first, hustle-first or social-first
2. Temptation	Y1 S2	Money gets real; Nneka, Lady Cat, The Pride	M-06 to M-08	Reject, tolerate or join
3. Fallout	Y2	First arrest, academic strain, Money Fork, gang and lecturer conflicts	M-09 to M-13	Recover, double down, or consider leaving
4. Power	Y3	Blackmail, fee hike and riot, exam leak, gang war, Fall Guy	M-14 to M-20	Rise, hide or collapse
5. Reckoning	Y4+	Dropout choice, committee, final year, ledger, takedown, endings	M-21 to M-27	Ending calculation

Main missions

ID	Title	Year	Location	Trigger	Main choices	Key consequence
M-01	The Bed	Y1	Hostel	Arrival after registration	Negotiate, report, challenge, pay, sleep elsewhere, move off-campus	Killer standing; first debt or respect
M-02	New Faces	Y1	Cafeteria, lecture hall	First morning	Amara, Nneka, influencers, association, isolate	Relationship tracks
M-03	The Lecturer's Warning	Y1	Lecture hall, office	First graded lecture	Apologise, challenge, report, evidence, fixer, deal	Okoro attitude; evidence flag
M-04	Gone	Y1	Hostel	Day 7-10	Report, confront, pay, borrow, hustle, risky job	Missing phone and laptop; unlocks economy
M-05	First Naira	Y1	Campus Market	After M-04	Stall, job, tutoring, risky stock, borrow	Income stream; supplier tie
M-06	Nneka's Ask	Y1	Market, nightlife	Nneka trust 20+	Spend, boundary, borrow, investigate, end, account	Debt and relationship arcs; Move: Squeeze
M-07	The Cat	Y1 S2	Cat's Lounge	Party invite	Accept favour, decline, ask questions, flirt, bring a friend	Lady Cat bond; Pride contact
M-08	The Offer	Y1 S2	The Den corridor	Vulnerability trigger	Reject, avoid, attend, infiltrate, accept protection, join	Faction gate; Rung 2-3
M-09	Station	Y2	Gate, station	Incident near the player plus message trail	Cooperate, call someone, lie, accuse, hide, bribe	Police record; Move: Frame
M-10	Falling Behind	Y2	Lecture halls, library	Low attendance or GPA	Attend event, study, ask Amara, buy answers, ignore	Academic warning or recovery
M-11	The Money Fork	Y2	Market, Business District	Cash above threshold	Route A, B or C	Wealth route; Chairman Notice
M-12	Jackals' Corner	Y2	Sports edge, motor park	Gang contest level 2	Mediate, warn, report, side, profit	Tension and gang standing

ID	Title	Year	Location	Trigger	Main choices	Key consequence
M-13	The Other Man	Y2	Lecture quarter, library	Lecturer pressure on a student	Support, report, confront, compete, walk away, use	Misconduct chain; Okoro string
M-14	The Debt	Y3	Nneka's flat, nightlife	Nneka's pressure peaks	Pay, end, demand, report, investigate, bargain, help her out	Blackmail resolved or deepened
M-15	Fee Hike	Y3	Admin, Union House	Admin announ cement	Organise, join, speak, stay out, spread information	SUG chain begins; tension up
M-16	The Campaign	Y3	Union House	Election season	Back, run, fund, social media, manipulate, intimidate, neutral	Political power or enemies
M-17	Smoke on the Steps	Y3	Union steps, gate	Protest turns tense	Steward, negotiate, expose, protect, flee, escalate	Riot outcome; Move: Expose
M-18	The Leak	Y3	Exam halls, admin	Exam season	Ignore, buy, share, report, investigate, conceal	Misconduct record
M-19	Two Sides	Y3	Streets, hostel	Gang war level 4	Refuse, warn, report, help escape, join, negotiate	Reputation and safety shift
M-20	Fall Guy	Y3-Y4	Hostel, station, court	Chairman heat 60+	Cooperate, lawyer, evidence, protect, conceal, blame, flee	Charges or clearance
M-21	Crossroads	Y4	Admin, family home, business district	Debt, failure or wealth threshold	Continue, leave, withdraw, abandon, resolve discipline first	Dropout path
M-22	The Committee	Y4	Disciplinary room	Misconduct accumulated	Attend, advice, admit, challenge, evidence, name others, improper influence	Rustication or expulsion outcome
M-23	Final Year	Y4	Whole city	Enrolled and not imprisoned	Graduate, expand, repair, investigate, internships, quit, flee	Final-state values
M-24	The Ledger	Y4	Cat's Lounge, The Den	Lady Cat bond or evidence	Earn, steal, destroy, protect, help her escape	Ledger status; string cuts begin
M-25	Cutting the Strings	Y4	Whole city	Ledger or 3 cut strings	One mission per string: pay, protect, expose, replace	Chairman's Teflon falls
M-26	The Last Offer	Y4	The Den	Teflon 40 or below	Take down, negotiate, join, flee, confront, hand over	Chairman's fate; world state
M-27	What Became of You	Y4+	Epilogue	After M-26	None (calculated)	Ending determined

Side missions

ID	Title	Trigger	Purpose
S-01	Study Group	Amara trust 20+	Academic help; reference later
S-02	Fellowship Night	Join fellowship	Safe community; off-ramp at Rung 2-3
S-03	Power Cut	Random night	Small business loss or opportunity
S-04	Landlord Trouble	Off-campus tenant	Housing and rights puzzle
S-05	The Scam Call	Phone use with money	Fraud awareness; lose or save cash
S-06	Delivery Rush	Delivery job unlocked	Time-management side income
S-07	Match Day	Join sports	Reputation and a gang flashpoint
S-08	Family Visit	Mid-year	Pressure, support, guilt
S-09	The Informant	Danjuma trust	Alternate route into M-24 and M-26
S-10	Pay It Back	After debt	Rebuild trust with a lender

ID	Title	Trigger	Purpose
S-11	Back to Class	After rustication or dropout	Return pathway
S-12	Prison Letters	Imprisoned	Prison-state content; family and business messages
S-13	A Night at the Lounge	Lady Cat bond 20+	Optional offer chain with personal choices
S-14	Cut a String	Per string	Eight short missions that lower Teflon (see M-25)
S-15	The Blog	Campus blog contact	Press route for evidence and riot reporting
S-16	Mama Cafeteria's Debt	Market trust 30+	Legitimate wealth ladder and community good

Mission template (every mission carries these fields)

Field	Meaning
ID, title, year	Unique key and placement
Location, trigger	Where it begins and the condition that fires it
Characters	Named participants
Objective	One-sentence player goal
Setup / cutscene	Short scene that frames the problem
Playable actions	What the player can actually do
Dialogue beats	Key lines and who says them
Choices	2-5 options with stat or relationship gates
Immediate, delayed, hidden consequences	Visible results, later results, and variables never shown
Systems affected	Academic, economy, relationship, reputation, police, faction, slide, strings
Success, failure states	Both lead somewhere (fail-forward)
Rewards, costs	Money, trust, items, time, Compromise, Heat
Unlock conditions, branches	What opens or closes
Cliffhanger	Hook into the next mission

Shared rules

- **Fail-forward:** failure never ends the game unless it hits a death condition. It changes the story and costs resources.
- **Non-violent exits:** every dangerous mission has at least one route that uses talking, reporting, evidence, help or leaving.
- **Stacking limit:** no more than two heavy mission threads open at once, to avoid overload.
- **Replay variation:** each mission has two or more openings depending on prior state.
- **Conditional chapters:** M-09, M-14, M-18 and M-20 only fire if their state conditions are met; if skipped, a substitute event keeps the thread alive.

11. First Playable Arc (M-01 to M-08)

The first arc takes about 3 to 4 hours, covers the first two in-game weeks plus the first months of Semester 2, and teaches movement, talking, time, money, academics, temptation and risk in that order. Dialogue is original and uses light Nigerian English and Pidgin; a native-speaker pass is advised.

M-01: The Bed (Hostel, Day 1, evening)

- **Trigger:** automatic after the registration cutscene and ID card. **Objective:** get a safe place to sleep before lights out at 22:00.
- **Setup:** the player's bag is in the corridor and a stranger's duffel sits on the assigned bed. Killer leans in the doorway with two friends.
- **Playable actions:** walk the corridor, inspect the bed and allocation slip, talk to roommates, check wallet (N8,500), use phone, enter the warden's office.
- **Killer:** "New face. Nobody knows you. If you want peace in this hostel, you must learn how things work." **Quiet One (whispering):** "Just don't argue. Not in front of his people."

Choice	Immediate	Delayed	Hidden
Negotiate politely	Window bunk for a N2,000 welcome fee	Small recurring respect asks	killer_respect +1, leverage +1
Report to warden	Bed returned; warden warns of noise	Labelled "snitch"	snitch +1, killer_grudge +2
Challenge Killer	Confidence check. Pass: bed returned. Fail: shoved, minor injury	Fight record or fear	bold +1, discipline_risk +1
Pay another student	N3,500 for a decent bed	Cash stress; that student remembers	seller_ally +1
Sleep in another room	Free tonight; host asks a favour	Obligation to a Pride-linked student	Rung 2 candidate; pride_contact +1
Search off-campus	Night search, extra cost, cramped room	Skips hostel storyline	hostel_exposure -1

- **Fail-forward:** a failed challenge costs health and cash but the player still gets a bed. **Systems unlocked:** sleeping, inventory, day clock, daily routine.
- **Cliffhanger:** lights out; a message from an unknown number: "Welcome to Lion's Den. Trust nobody yet."

M-02: New Faces (Cafeteria and Lecture Quarter, Day 2-3)

- **Objective:** make at least two connections before the first lecture. **Setup:** Amara solves a past question in a corner; Nneka draws attention by the entrance.
- **Amara:** "First week, everybody is dancing. Second week, the results start talking." **Nneka:** "Relax, fresher. I'll show you where life is happening. There's a party on Friday."

Choice	Result	Unlocks
Sit with Amara	Study tips and note-sharing	S-01
Chat with Nneka	Party invite, introductions to wealthy students	M-06 track
Join an association	Small friend group, membership fee	Social events
Isolate and study	More study time, no social boost	Loneliness meter (feeds Lady Cat trigger)
Mix with influencers	Contacts, status pressure	Spending pressure

- **Cliffhanger:** Amara warns, "Be careful who pays for your lunch."

M-03: The Lecturer's Warning (Day 4)

- **Trigger:** first lecture of GST101 (fictional course). **Objective:** survive the lecture and decide how to treat Dr. Okoro.
- **Dr. Okoro:** "You think you know everything because you have just entered university? Passing this course is not as easy as you think." In his office, quietly: "Students who understand cooperation usually do better."

Choice	Immediate	Delayed	Hidden
Apologise	Tension drops	Mild bias against the player	okoro_hostility 0
Respectfully challenge	Peer respect; Okoro cold	Harder marking	okoro_hostility +2
Report to department	Official file opens; slow	Inquiry or retaliation	complaint_filed
Record evidence	Audio evidence item	Key evidence in M-13, M-18, M-25	evidence_okoro +1
Pay a fixer	N5,000; fixer vanishes or delivers	Possible scam; Pride-linked contact	scam_risk +1; Rung 1
Accept an arrangement	Immediate relief	Blackmail later	okoro_leverage +2; Rung 2

- **Systems unlocked:** attendance, assignments, tests, exams, GPA. **Cliffhanger:** a scanned note under the office door: "Not everyone in this department plays fair."

M-04: Gone (Hostel, Day 7-10)

- **Trigger:** the player returns to find the phone and laptop gone (or the bag only, if valuables were carried). **Objective:** recover or replace the items and keep up academically.
- **Clue system:** four clues (bag strap, witness, pawn receipt, message trace). Two or more clues allow a targeted confrontation or a fair report.

Choice	Result	Hidden
Report to security	Official report; slow	police_trust +1
Confront Killer	Skill check; may recover or provoke a fight	killer_grudge changes
Pay someone to recover	N6,000; may recover or be scammed	scam_risk +1
Borrow to replace	Debt starts	debt_total up; lender noted
Start a hustle	Moves to M-05	economy unlocked early
Take a risky job	Quick N10,000 for an unknown contact	pride_contact +2, heat +1; Rung 3

- **Persistence:** items stay missing until recovered or replaced; without a laptop the player must use the library, and cannot work at night. **Cliffhanger:** a pawn shop owner texts: "I may have what you're looking for. Come alone."

M-05: First Naira (Campus Market, Day 10-14)

- **Objective:** earn N15,000 in seven in-game days. **Playable actions:** compare stall rental, choose a product (food, accessories, printing), buy stock, set prices, serve customers in a short timed mini-game, handle a slow day.
- **Teaches:** margin, stock, demand, power cuts, and that a day selling is a day not studying. **Risk offer:** a stranger offers cheap accessories with no receipts; accepting is a temptation with a visible risk meter, not an instruction.

Choice	Result
Legitimate stall	Slow, steady; supplier trust grows
Part-time shop job	Safe income, fixed hours
Tutoring	Uses academic skill; builds Amara's respect
Receipt-less stock	Higher profit; theft-linked flag; may be seized (Rung 1-2)
Borrow instead	Faster now, debt later (Rung 3)

- **Unlocks:** wallet, ledger, business tab, jobs board. **Cliffhanger:** a supplier says the market is changing and "someone is collecting fees".

M-06: Nneka's Ask (Market, hostel, nightlife, Day 14 onwards)

- **Trigger:** Nneka trust 20+ or attended the Friday party. **Objective:** decide how much of your money, time and trust is for someone else.
- **Structure:** three escalating requests over three in-game weeks: transport money, an expensive night out, an "emergency". **Nneka:** "You're different from the other guys. It's just a small thing." Later: "If I don't pay by Friday, they'll make trouble for me."

Choice	Immediate	Delayed
Spend freely	Closeness up, cash down	Debt and dependency
Set a boundary	Slight tension; she tests you	Respect or distance
Borrow to help	Quick fix	Debt with a lender who knows her (Rung 3)
Investigate her	Finds she reports to Lady Cat	Opens the hidden Pride storyline
End it	Clean break; she may retaliate	Enemy or reluctant ally
Stay but refuse money	Gradual change	Genuine partner path
Let her use your account	Large trust jump	Blackmail risk (M-14)

- **Hidden:** nneka_leverage, nneka_pressure, nneka_loyalty. **Cliffhanger:** a stranger on a bike watches the player after the party.

M-07: The Cat (Cat's Lounge, Semester 2)

- **Trigger:** invited by Nneka or by a well-known party host; can also appear after the player is broke or humiliated. **Objective:** get through the door, and decide whether to remember the night.
- **Setup:** the strip is lit in green and gold. Lady Cat sits at the back with her scarf, watching who comes in. She is kind, quick and unhurried.
- **Lady Cat:** "A fresher with good manners. Sit, you look like you haven't eaten properly." After the player answers: "I don't ask for much. Sometimes, though, I like to know who I'm talking to."
- **Playable actions:** talk, dance mini-game, check the guest list, spot who is on a string (visual hints: matching rings, glances), accept or refuse a small favour.

Choice	Immediate	Delayed	Hidden
Accept a small favour (carry a message across the room)	Easy N2,000	She remembers; first string on the player	Rung 2; lady_cat_bond +10
Decline politely	She smiles; you leave with respect	She tests you again later	lady_cat_bond +3; integrity +
Ask who she works for	She deflects	Opens an investigative thread (S-13)	curiosity +1; notice +5
Flirt	She plays along or redirects	Romance track starts only if both clearly consent	bond +8; Notice +10
Bring a friend (Amara)	Amara is uneasy	Amara trust drops or rises by choice	friend_exposed flag
Leave early	Safe night	Offers return when vulnerable	none

- **Fail-forward:** an early exit never blocks Lady Cat; vulnerability triggers re-open her offers. **Cliffhanger:** a note on the way out: "Come back when it's hard. - C."

M-08: The Offer (The Den corridor, Semester 2)

- **Trigger:** a vulnerability trigger (broke, failing, lonely, or humiliated), a Killer link, a Nneka link or an unresolved theft. **Objective:** hear what Chairman wants and decide.

- **Setup:** a quiet corridor at night. A neatly dressed senior sits with Lady Cat standing beside him. He is warm and unhurried.
- **Chairman:** "Nobody survives Lion's Den alone. I'm not asking for much today. Only to know whether you are someone who understands loyalty." As the player leaves: "Think about it. The offer does not stay open forever."

Choice	Result	Slide effect
Reject firmly	Short intimidation, then isolation or warning	Compromise unchanged; Notice +10
Avoid	Repeated approaches over weeks	Heat of attention; Notice +5
Attend one meeting out of curiosity	Reveals structure; a message trail forms	Rung 2; Compromise +5
Pretend to join and gather information	High risk, high evidence	Rung 3; evidence item
Accept protection without joining	Safety for a price	Rung 3; first Squeeze later
Join	Money, access, danger, loyalty demands	Rung 4; Pride rank 1

- **Exit rule:** the player may always leave, but exit costs money, evidence, an ally or a favour, scaled by rank. **Cliffhanger:** a screen: *Year 1 ends. Decisions made here will be remembered.*

First-arc teaching order

Mission	Systems introduced
M-01	Movement, interaction, dialogue, wallet, inventory, time
M-02	Relationships, phone, social meters
M-03	Academics, attendance, evidence
M-04	Investigation, clues, debt, persistence
M-05	Economy, business, stock, ledger
M-06	Trust, boundaries, financial risk, hidden storylines
M-07	Temptation, vulnerability triggers, Lady Cat bond, strings
M-08	Factions, the Slide, Notice, exit costs

12. Core Systems

Eight systems carry the game. All thresholds are game rules for the fictional Lion's Den University and a fictional legal system, not real Nigerian university or criminal-justice policy. Numbers are starting values for tuning.

12.1 Academic

Element	Rule
Structure	4 years, 2 semesters each, about 6 courses per semester, 2-4 credit units each; 3 departments at start (Business, Sciences, Arts)
GPA	5.0 scale, weighted by credit units
Attendance	Below 75% in a course bars the player from that exam
Assessment	Continuous assessment 30% (assignments, quizzes, group work); exam 70%
Grade bands	A 70+, B 60-69, C 50-59, D 45-49, E 40-44, F below 40
Standing	Good (GPA 2.5+), Warning (1.5-2.49), Probation (1.0-1.49 or two failed courses), Withdrawal review (below 1.0)
Resits	A failed course can be repeated once per semester; extra fees apply
Scholarship	Requires GPA 3.5+ and a clean record; lost on misconduct
Graduation	Credit units complete, no outstanding disciplinary case, fees cleared

Academic offence	Immediate effect	Record effect
Missed lectures	Attendance drops; fewer exam clues	Possible barring
Buying exam answers	Chance of passing	If caught: course void, misconduct file, possible rustication
Bribing for marks	Costs money	Blackmail risk; severe penalty if exposed
Forged documents	May skip a requirement	Permanent integrity flag
Intimidating staff or students	Short-term compliance	Disciplinary case and reputation damage

12.2 Economy and business

Element	Rule
Currency and start	Naira. Starting wallet N8,500
Costs	Hostel fees, meals, transport, data, printing, clothing
Ledger	Every transaction logged: date, amount, counterparty, category, note
Debt	Each loan has lender, principal, interest, due date and consequences; Pride-linked lenders also add a string
Savings	Optional; small return; protects against theft
Theft and scams	Cash on hand is vulnerable; bank balance is safer but delayed
Business mechanics	Stock, price, quality, location, staff, shop reputation, daily footfall; staff have honesty and skill values and can steal or leave
Failure	Insolvency, supplier fraud, fire, theft or closure order; leaves debt or lesson, not game-over

12.3 Relationships, reputation and rumour

Meter	Range	Notes
Trust	-100 to +100	Gates dialogue, missions and help
Affection or friendship	0 to 100	Romantic or close-friend paths (adults only; consent explicit)

Meter	Range	Notes
Fear	0 to 100	For antagonists
Obligation	0 to 100	Favours owed either direction
Respect	0 to 100	Competence, fairness
Notoriety	0 to 100	Trouble reputation
Wealth visibility	0 to 100	More requests, more targets
Integrity	0 to 100	Whistleblower route depends on it

Rumours appear on the phone and notice boards. They can be true, false or exaggerated and can be countered with evidence or time. Chairman uses rumours as a weapon (Move: Expose).

12.4 Police and legal

Stage	Rule
Heat	0-100; rises with proximity to incidents, linked messages and Pride ties
Questioning	At heat 30+; the player can cooperate, seek help or stay silent
Detention	At heat 60+ with evidence or a witness; time passes; business and classes suffer
Charges	Require evidence thresholds; innocents can be wrongly implicated
Court	Fictional court decides using evidence, witnesses and character references
Conviction	Only after charges and a trial result. **Arrest is not conviction.**
Legal help	Family lawyer, legal aid officer, counsellor
Corruption	A bribe offer is a trap that can raise charges or give leverage to others; it is never a clean solution

12.5 Survival, death and prison

State	Rule
Health and stress	Health 0-100; stress rises with debt, threats and exams; high stress raises error chance
Danger events	Always telegraphed at least twice (messages, rumours, NPC warnings)
Death	Only from a critical event after warnings and ignored exits; shown through aftermath, never graphic
Prison	A distinct state: no campus access; no business control unless a trusted manager exists; family impact; a chapter-length sequence
Return	After prison or rustication the player can return to the city, and to university only if the fictional rules allow

Save mode	Rule
Story	Autosave plus manual saves; death returns to the last checkpoint
Consequence	Fewer saves; death returns to a major checkpoint with world changes
Permadeath (optional)	One life; death ends the run and unlocks a legacy summary

13. Decision Variables and Save State

One central PlayerState holds everything the story reads. Missions never read each other; they only read and write state. This keeps the Year One to Year Four memory requirement testable.

Group	Examples	Visible?
Identity	name, appearance, background, family support	Yes
Time	day, semester, year, hour	Yes
Academic	gpa, per-course attendance and grades, standing, misconduct flags, scholarship	Mostly
Money	cash, bank, debts[], ledger[], net worth, wealth tier, wealth route (A/B/C)	Yes
Business	owned businesses[], stock, staff, supplier trust	Yes
Relationships	per-character trust, affection, fear, obligation, memory flags	Partly
Reputation	respect, notoriety, wealth visibility, integrity, rumours[]	Partly
Factions	membership, rank, loyalty, obligations, exit cost	Partly
Slide	compromise, rung, justification log, invitations declined	Partly (tone)
Chairman	notice, teflon, strings[] (id, holder, type, status), heat_chairman, moves_fired[]	No
Lady Cat	bond, offers taken, offers refused, ledger status, fate flag	Partly
Conflict	campus_tension, gang_standing (Pride, Jackals), zone ownership, union_standing, riot_outcome	Partly
Evidence	items[] with source, strength, holder, whether still held	Yes
Police and legal	heat, record[], charges[], case status, lawyer access	Partly
Health	health, stress, injuries[]	Yes
Story	mission states, choice log, branch tags	No
Location	current district, unlocked districts, access keys	Yes

Choice record and events

```
ChoiceRecord {
  id: string                // e.g. "M08_offer"
  day: int
  mission_id: string
  option_selected: string
  affected_characters: [id]
  effects_applied: [ {variable, delta} ]
  compromise_weight: int    // feeds the Slide
  visibility: int           // feeds Chairman Notice
  delayed_effects: [ {trigger_condition, effect} ]
  hidden_flags: [string]
}

onChoice(choice):
  apply(choice.effects_applied)
  state.compromise += choice.compromise_weight
  state.notice     += choice.visibility
  state.choice_log.append(choice)
  for d in choice.delayed_effects:
      scheduler.register(d.trigger_condition, d.effect)
  if state.compromise >= RUNG_THRESHOLD[state.rung + 1]:
      queue(Invitation(state.rung + 1))      // an offer, not a force
```

Chairman Move and Fall Guy logic

```
onSemesterStart():
  if state.notice >= 20:
      candidates = MOVES.filter(m => m.requires(state) and string_available(m))
      move = weighted_pick(candidates, by = player_vulnerability(state))
      schedule(move, delay_days = rand(3, 10))      // telegraphed 2+ times first

onHeat(chairman):
  if state.heat_chairman >= 60:
      fall_guy = pick_string_holder(
          prefer = player if state.rung >= 4 and state.evidence_exposed
                   else lowest_value_string)
      fire FallGuyEvent(fall_guy)
      state.heat_chairman -= 40

canArrestChairman():
  return state.teflon <= 20 and ledger_found(state) and institution_ready(state)
```

Persistence rules

Rule	Detail
Stolen items	Remain missing until recovered or replaced; ownership is inventory state
Debts	Persist and accrue; cleared only by payment, forgiveness or consequences
Failed courses	Permanent on the transcript; a resit adds an attempt but never deletes the old one
Police record	Persists; arrests and charges are separate records
Strings	Cut strings stay cut; replaced or rebuilt strings are new entries
Evidence	Has strength, holder and exposure risk; can be lost, stolen or leaked
Character memory	Each character stores key flags and last N interactions

Save data and integrity

Topic	Specification
Format	Versioned JSON (or binary) with schema number so old saves can migrate
Slots	3 manual, 1 autosave, 1 checkpoint per chapter
Integrity	Checksum; reject corrupted data and offer the previous autosave
Migration	Each patch ships migration scripts for older schemas
Debug	Developer mode exports the state and choice log to reproduce bugs

14. Endings and Progression Rules

There are 16 endings: 12 core and 4 hidden. They are calculated at the end of M-26 from accumulated state; the player sees a summary and never the formula. Evaluate in priority order; the first ending whose conditions are met wins unless a modifier applies.

Priority	Ending	Required state (all thresholds tunable)
1	Death	death_flag set by a critical event after ignored warnings
2	Prisoner	Active conviction and prison_sentence above 0
3	Disappeared	Fled an investigation (M-20 or M-26 option) with no legal clearance
4	Expelled Student	Expulsion recorded and not reversed
5	Rusticated Student	Rustication active or served; not graduated
6	Whistleblower / Redemption	Ledger or strong evidence delivered, integrity 50+, allies protected; Chairman falls or is exposed
7	Campus King	Pride rank high, notoriety high, wealth high, evidence withheld; Chairman removed or replaced
8	Financial Collapse	Debt above net worth, businesses failed, no criminal ending
9	Campus Millionaire	Net worth above Mogul tier, wealth mostly legitimate (Route A) or acceptable mix
10	Dropout Tycoon	Withdrawn or abandoned, Boss tier or above, legal status clear
11	First-Class Graduate	Graduated, GPA 4.5+, no misconduct
12	Successful Graduate	Graduated, GPA 2.5+, no unresolved case

Hidden endings

Ending	Condition	Why hidden
The Wealthiest Graduate	Graduated at 3.5+ GPA and Tycoon tier with clean books	Rewards both Learn and Hustle
Chairman Falls	Teflon 20 or below, ledger delivered, Chairman arrested or expelled	Requires the full takedown campaign
The Reformed Pride	Lady Cat and Razor survive; Pride dissolved by agreement	Very specific relationship repair
The Mentor	Graduated late or returned later to help new students; post-credits epilogue	Rewards long-term care for others

Modifiers applied to any ending

Modifier	Effect on epilogue
Family relationship	Shapes the final family scene
Lady Cat's fate	Ally, partner, next Chairman, escaped, lost
Nneka's fate	Partner, enemy, ally, sacrifice
Amara's fate	Colleague, friend, partner, estranged
Chairman's fate	Falls, escapes, successor, inherited
Wealth legitimacy	Celebrated, hidden or investigated
Police record	Whether the past follows the player into work

Progression rules

- **No dead ends:** a bad ending still shows consequences for the world; New Game Plus keeps knowledge, not state.
- **Visible hints:** the player sees broad indicators (reputation tier, standing, debt, mood) but never exact conditions.
- **Where You Stand:** an end-of-year screen shows which path the player is drifting toward.
- **Reversibility:** most states can change with effort. Only death, confirmed expulsion on appeal, and long imprisonment are hard to reverse.
- **Ending gallery:** shows unlocked endings and non-spoiler hints for the rest.

15. Technical Architecture and Production Roadmap

Recommendation: build in Unity targeting low-end Android first, with PC second; Godot is the budget fallback. Nigerian players are mostly on mid- and low-range Android phones, and a blocky low-poly style is cheap to render, so reach, hiring pool and tooling matter more than top-end graphics. Engine licence terms change, so verify current terms before committing.

Engine	Strengths	Weaknesses	Fit
Unity	Mature Android export, large asset store, large talent pool, strong 3D and UI tools	Licence terms have changed before; heavier runtime than needed	Recommended
Godot	Free, open source, light, good for stylised 3D	Smaller hiring pool and ecosystem; younger mobile 3D tooling	Best budget alternative
Unreal	Top-end visuals, world tools	Heavy for low-end phones; overkill for blocky art	Not recommended
Web (Three.js / Babylon)	Instant play via link	Weaker performance and saves on low-end phones	Demo only

Modules

Module	Responsibility	Depends on
World and map	Districts, streaming, interiors, day/night, lockdown states	Save, Time
Time and calendar	Clock, semester, deadlines	None
Character AI	Schedules, pathing, crowds, NPC state	World, Time
Dialogue	Branching conversations, tone, localisation hooks	Relationship, State
Mission and quest	Triggers, objectives, states, Move scheduling	State, Events
Decision state	PlayerState, choice log, delayed-effect scheduler	Save
Slide and strings	Compromise, rungs, Invitations, strings, Teflon, Moves	State, Mission
Conflict	Tension meter, gangs, SUG chain, riot logic	State, World, Mission
Academic	Courses, grades, attendance, discipline	State, Time
Economy and business	Wallet, ledger, stock, staff, prices, wealth tiers	State, Time
Inventory and evidence	Items, ownership, evidence strength	State
Relationship and reputation	Meters, memory, rumours	State, Dialogue
Police and legal	Heat, questioning, charges, court	State, Mission
Save/load	Serialisation, migration, checksum	State
UI and input	HUD, phone, menus, mobile touch, controller	All (read-only)

Event flow: the player acts; the action module raises an event (for example ItemPurchased); economy, inventory and relationship update state; the Slide module may queue an Invitation; the mission module checks triggers; the UI refreshes. No module changes another module's data directly.

Controls

Platform	Scheme
Mobile	Left virtual stick to move, right action button, contextual tap targets, phone menu from a corner icon
Keyboard and mouse	WASD, E to interact, Tab for phone, number keys for dialogue choices
Controller	Left stick move, A interact, Y phone, shoulder buttons run and crouch

Core actions at launch: walk, run, interact, talk, inspect, use phone, inventory, sleep, eat. Unlocked later: crouch and stealth, negotiate and persuade, run a business, trade, report incidents, collect evidence, rent accommodation, vehicles.

Low-end optimisation

- Simple meshes, limited materials, texture atlases, baked lighting.
- District streaming; crowd density scales with device tier; hide distant NPCs.
- Target 30 fps on a 3 GB RAM Android phone; install size under 400 MB at first release; offline play by default.

Roadmap

Stage	Scope	Content	Exit test
0. Pre-production	Design lock, art tests, engine decision	This document, 3 character blocks, 1 room	Founder sign-off
1. Prototype	Hostel Zone, Cafeteria, one lecture hall	M-01, M-02; walk, talk, wallet, time	10 testers finish M-01 and explain what they would change
2. Vertical slice	Add Campus Market, economy, academics	M-03 to M-06; Nneka arc part 1; first Slide invitation	A 60-minute polished session on a real low-end phone
3. First playable release	Year 1 complete	M-01 to M-08, S-01 to S-05, Lady Cat and Chairman intro	External playtest, retention and clarity data
4. Full release	Years 2 to 4	M-09 to M-27, 12+ endings, prison state, conflicts and riot	Balance and bug pass
5. Expansions	New districts and stories	More lecturers, factions, seasonal events	Community feedback

Planning estimate (not a quote): a team of about 6 to 10 (producer, 2 to 3 engineers, 2 artists, 1 narrative designer, 1 QA, part-time audio) could reach a vertical slice in roughly 4 to 6 months and a full release in 18 to 30 months, depending on scope. Get quotes from real studios before budgeting.

Production practices

Area	Practice
Content tools	Spreadsheet or JSON-driven missions, dialogue and string definitions so writers do not need engineers
Testing	Automated tests for state transitions, Slide thresholds, Move selection and save migration; a manual regression list per build
Localisation	English first; Pidgin and Yoruba, Igbo and Hausa flavour lines as data, not code
Accessibility	Subtitles, text size, colour contrast, content-warning screen
Analytics	Opt-in and privacy-friendly; track quit points and path choices
Age gate	18+ gate and content warning; ratings applied honestly

16. Risks, Scope Controls, Assumptions and Founder Decisions

The biggest risk is scope. A 27-mission open world with persistent consequences, a villain system and six conflict systems is a multi-year project, so the plan is to prove one hostel, one economy loop, one Lady Cat offer and one memorable consequence first.

Risk	Likelihood	Impact	Mitigation
Scope creep from open world, 16 endings and 6 conflict systems	High	High	Prototype and slice gates; endings as state summaries first; conflict systems ship in phases
Branching explosion	High	High	Shared state variables, few high-impact branches, merge paths, automated state tests
Cultism, crime and breaking-bad themes read as glamorous or instructional	Medium	High	Consequence-first design; no operational detail; sensitivity review; clear non-violent routes; visible costs on every dark reward
Lady Cat reduced to a stereotype	Medium	Medium	Give her agency and a redemption arc; Nigerian women writers and testers review her scenes
Lecturer storyline misread as romance	Medium	High	Always present as abuse of power; no romance route with lecturers; consent and adult-only rules in every scene
Cultural accuracy and stereotype risk	Medium	Medium	Nigerian writers and playtesters; balanced portrayal of students and institutions
Real-institution resemblance	Low-Medium	Medium	Fictional-universe notice; no real names, logos or staff
Age rating and store policy	Medium	High	18+ gate, content warnings, honest questionnaires, check local classification rules
Low-end performance	Medium	High	Optimise from the prototype; test on real 3 GB phones
Logo and in-game art mismatch	Medium	Medium	Brand guide adapting the logo's gold and green to blocky UI; keep logo for marketing
Minecraft similarity	Low-Medium	High	Original art and rules; no Minecraft assets, branding or distinctive designs
Budget and team gaps	High	High	Phase funding by exit tests; consider grants or a publisher after the slice
Save corruption	Medium	High	Versioned saves, checksums, autosave history

Scope controls

- **Prototype only:** M-01, M-02, Hostel Zone, Cafeteria, one lecture hall, wallet, time, relationship basics.
- **Cut first if behind schedule:** prison storyline (use a short summary ending), vehicles, the Jackals as a playable path, large sports content.
- **Never cut:** persistence, dropout path, the Slide, non-violent options, fail-forward rules. They are the product's identity.
- **Rule:** any new feature must name its roadmap stage and the feature it replaces or delays.

Assumptions made in this draft

Assumption	Where it matters
Mobile-first Android release; PC second	Engine, controls, size limits
Single-player and offline	Saves, no server cost
Naira prices approximate student price levels	Economy balance

Assumption	Where it matters
University structure is a general 4-year, 2-semester pattern, labelled as fictional game rules	Academic system
All characters are adults and mature romantic content is off-screen	Content and ratings
English with Pidgin flavour; other Nigerian languages later	Localisation
The live website has no confirmed game build beyond your brand material	Brand claims

Decisions needed from you (founder)

No.	Question	Why it matters	My suggestion
1	Official tagline: "Learn. Hustle. Survive." or the logo's "Learn, Grow. Survive."?	Documents and logo disagree	Choose one and update the other everywhere. Your master prompt uses "Hustle"; the logo says "Grow".
2	Is the protagonist male only, or player-chosen gender?	Hostel, relationships and dialogue scope	Offer a choice only if budget allows; write neutral dialogue now
3	Default protagonist name?	Voice and marketing	A neutral default with player rename
4	Mobile-first, PC-first, or both?	Engine, controls, price	Mobile first
5	Free with ads, paid, or episodic?	Economy and ratings	Paid or episodic suits a mature consequence game
6	Budget range and team size?	Roadmap realism	Fund through the vertical slice first
7	First release length?	Content volume	Year 1 complete (M-01 to M-08)
8	Prison: full chapter or short ending?	Large scope item	Short ending in release 1
9	Will Nigerian writers and playtesters be contracted?	Authenticity	Yes, from the prototype
10	Keep the realistic logo for marketing and add a blocky icon variant?	Brand consistency	Yes
11	How dark should the Slide end in release 1?	Tone and rating	Allow Rung 7 as an ending, with strong content warnings

17. Appendix: Developer Content Rules and Glossary

Content rules every team member must follow

- Every character in a romantic, sexual or abuse-of-power storyline is 18 or older and shown that way in text, art and voice.
- Sexual content is implied and off-screen. Lecturer-student relationships are always depicted as abuse of authority, never as romance, and never as something the player can pursue.
- Violence is non-graphic: sound, silhouette, camera cut, aftermath. No gore, no torture scenes, no detail that works as a how-to.
- The game never teaches real-world methods of crime, violence, evading police or concealing evidence. Wrong acts are abstract states with consequences.
- The Pride and The Jackals are fictional. Do not use real confraternity names, symbols, rituals or initiation details.
- Every dark reward must show a visible cost. Never present cult life or crime as aspirational without cost.
- Every dark path has at least one meaningful way out, at a higher price than the way in.
- Suicide, self-harm, and sexual violence are out of scope for release 1.

Glossary

Term	Meaning
Slide	The descent system: Compromise points push the player down eight rungs
Compromise	Hidden score of how far the player has slid
Rung	A level on the Slide (0 Clean to 7 Point of no return)
Invitation	An offer scene that opens the next rung; can be declined once at a cost
Heat	Police and campus attention (player or Chairman)
Notice	How closely Chairman watches the player
String	A leverage card Chairman holds on one person
Teflon	Chairman's protection meter (100 to 0); arrest is possible at 20 or below
Move	A scheduled pressure action by Chairman (Squeeze, Frame, Isolate, Drain, Expose, Summon)
Fall Guy	Event where Chairman shifts blame onto a string-holder when heat is high
The Ledger	Lady Cat's private record of every string; the key to the takedown
The Pride	Chairman's cult-linked network (fictional)
The Jackals	Rival student gang (fictional)
SUG	Student Union Government
Tension	Campus-wide conflict meter, 0 to 100
Money Fork	The Year 2 mission where the wealth route is chosen (Clean, Grey, Pride)

End of document. Version 2.0, Final Draft for Developers. Supersedes Draft 1. All thresholds are tunable game rules and all organisations, people and rules in this document are fictional.
